### **June 2021**

School's out, and as vaccination rates rise and America enters a new normal, the U.S. housing market continues along at a frenzied pace, with low interest rates and limited inventory fueling record high sales prices. May saw the median existing-home sales price exceed \$350,000, a 24% increase and the largest year-over-year increase since 1999, according to the National Association of REALTORS®. Eager buyers are making multiple offers, some for well over asking price, while others are making offers on homes sight unseen.

New Listings decreased 56.9 percent for New Construction but increased 18.4 percent for Existing Homes. Pending Sales decreased 70.8 percent for New Construction but increased 4.4 percent for Existing Homes. Inventory decreased 27.3 percent for New Construction and 15.0 percent for Existing Homes.

Median Closed Price increased 9.8 percent for New Construction and 15.9 percent for Existing Homes. Days on Market decreased 23.3 percent for New Construction and 72.2 percent for Existing Homes. Months Supply of Inventory decreased 38.1 percent for New Construction and 20.0 percent for Existing Homes.

The increase in sales prices comes with a slight decline in existing home sales nationwide, as homebuyers struggle with declining affordability amid a lack of inventory, forcing some buyers to simply wait it out in hopes of more inventory and less competition. Meanwhile, home builders are trying to meet the increased market demand, with housing starts up 3.6% in May from April, according to the Commerce Department. As we ease into new routines and look forward to a post-pandemic future, one thing remains certain: America desperately needs more homes.
