Monthly Indicators

Lincoln Area Region

November 2023

Low inventory, elevated sales prices, and decades-high interest rates continue to weigh on the housing market, causing sales of existing homes to fall to their slowest pace since August 2010. According to the National Association of REALTORS® (NAR), U.S. existing-home sales declined 4.1% month-over-month and 14.6% year-over-year as of last measure, as prospective buyers, faced with rising homeownership costs, wait for mortgage rates, and home prices, to drop.

New Listings increased 3.7 percent for New Construction and 24.4 percent for Existing Homes. Pending Sales decreased 24.2 percent for New Construction but increased 3.1 percent for Existing Homes. Inventory decreased 18.2 percent for New Construction but increased 64.7 percent for Existing Homes.

Median Closed Price increased 6.6 percent for New Construction and 8.0 percent for Existing Homes. Days on Market increased 44.0 percent for New Construction and 14.3 percent for Existing Homes. Months Supply of Inventory decreased 3.1 percent for New Construction but increased 100.0 percent for Existing Homes.

Inventory remains at historically low levels nationwide, with only 1.15 million homes for sale heading into November, a 5.7% decline compared to the same time last year, for a 3.6 months' supply at the current sales pace. The shortage of available properties for sale has kept pressure on home prices, which have continued to climb despite the slowdown in sales. According to NAR, the U.S. median existing-home sales price increased 3.4% from a year ago to \$391,800, an all-time high for the month, with annual price gains reported in all four regions of the country.
